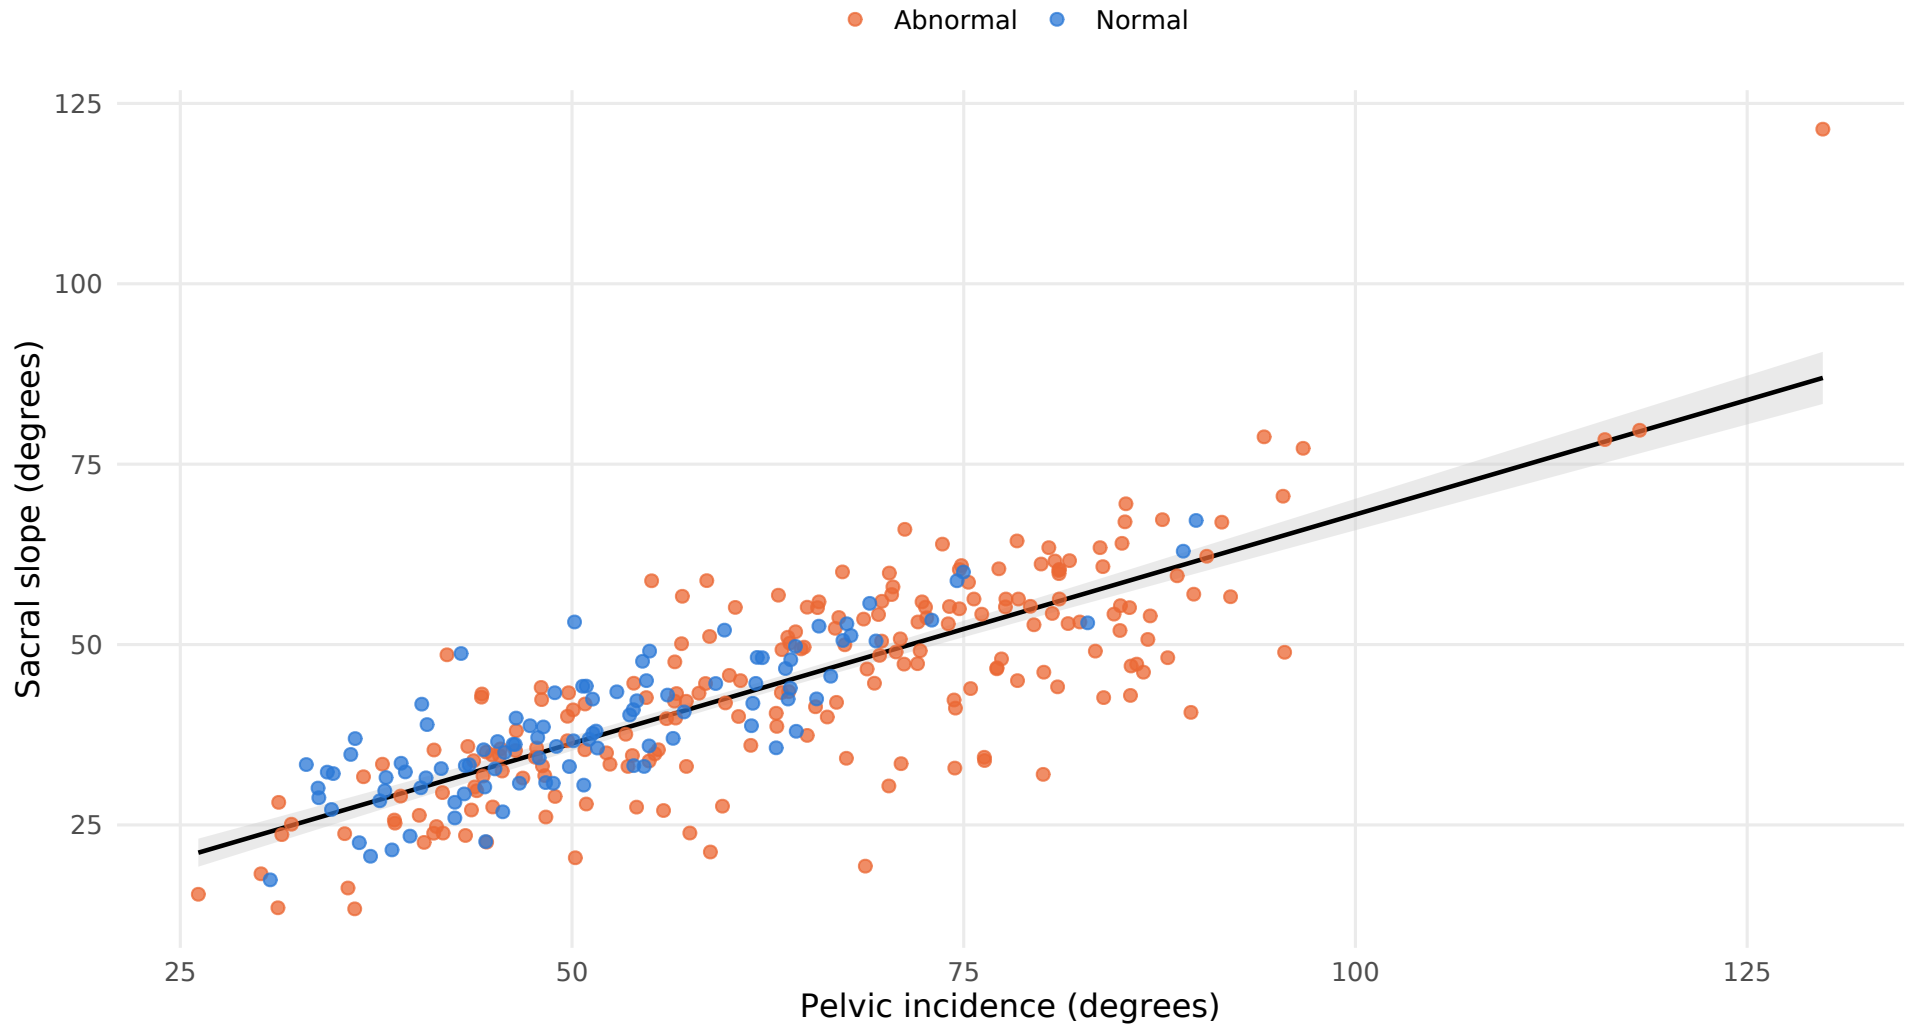
Sacral slope increases linearly with pelvic incidence in both groups

Pearson r = 0.81, Spearman rho = 0.80 (both p < 0.001), n = 310
Least-squares line: Sacral slope = 4.56 + 0.63 x Pelvic incidence, R^2 = 0.66



Grey band = 95% confidence interval of the line. Pelvic incidence = pelvic tilt + sacral slope by definition, which explains the strong correlat
